CHANGE REQUEST

elimina il pannello solare di destra

CASCADE ISSUES IDENTIFIED

[MAJOR] ISSUE-001 — Power generation reduced

Subsystem: solar | Req: L1-PWR-001 | Type: constraint_violation

Removing the right solar panel reduces power generation capacity, potentially exceeding the power budget during imaging mode.

[MINOR] ISSUE-002 — Mass reduction below requirement

Subsystem: structure | Req: None | Type: missing_test

Removing the right solar panel reduces total mass, potentially causing a margin above the required limit.

[MINOR] ISSUE-003 — Thermal balance affected

Subsystem: thermal | Req: None | Type: reanalysis_required

Removing the right solar panel affects thermal distribution and may impact temperature stability across orbital cycles.

[MINOR] ISSUE-004 — Structural integrity compromised

Subsystem: mechanical | Req: None | Type: reanalysis_required

Removing the right solar panel alters structural balance and may affect mechanical constraints such as vibration response.

MISSING ECSS TESTS — NOW REQUIRED

ECSS-E-ST-10C §5.3 §5.3 — Power generation re-evaluation after solar panel removal

Reason: To ensure power supply remains within budget post-change

ECSS-E-ST-21C §4.6 §4.6 — Structural integrity re-evaluation after solar panel removal

Reason: To ensure structural constraints are not violated post-change

SUBSYSTEM STATUS — UPDATED
